EXPERIENCE

LUMSTON + POINT B

Senior Technical Writer (March 2024 – November 2025)

- Owned the internal Technical Writing department, establishing standards and managing the company documentation systems and processes.
- Led the AWS Generative AI Competency documentation effort.
- Documented governance, operational, and compliance standards for the technology department of a financial institution.

ALTEN (SPAIN)

Senior Technical Writer (October 2024 – February 2025, project-based contract)

- Documented governance, operational, and compliance standards for a fintech company.

WIZELINE

Technical Writer III (January 2022 – June 2024)

- Generated UX copy and documented an AI-powered web application that interacts with video content through a responsive chatbot interface.
- Developed the documentation for an innovative project that uses AWS Rekognition to create highlight reels.
- Worked with a software security company to document low-level encryption and decryption systems.

- Created tutorials and demo videos for clients and stakeholders.
- Played a key role in developing the Wizeline TW Spanish Style Guide.
- Pitched documentation proposals and presented deliverables to clients.

Technical Writer II (April 2021 – January 2022)

- Trained employees across over 400 stores of the largest e-commerce company.
- Revamped Confluence spaces to organize and standardize the documentation.
- Reduced costs for onboarding and transitioning Software Engineers, leading knowledge transfer sessions.
- Managed multiple projects concurrently, ensuring timely delivery of all documentation.

Associate Technical Writer (April 2020 – April 2021)

- Created user, architecture, onboarding, administration, installation, configuration, and software development guides.
- Helped UI/UX teams to create and improve copy.
- Edited, reviewed, and formatted READMEs following the Git flow and SWEs' best practices.
